THE ENERGY YEAR
Information is power

Kuwait Energy Leaders Summit

& Book Launch Ceremony

 **9 AM (GMT+3) - December 15, 2025**

 **Four Seasons Hotel Kuwait**
at Burj Alshaya, Al Soor Street,
AlMirqab, Kuwait City, Kuwait

The Kuwait 2025 Energy Leaders Summit & Book Launch Ceremony

will convene the nation's most influential energy leaders, C-suite executives and key decision makers for high-impact discussions on the future of Kuwait's energy industry.

This exclusive event will feature networking opportunities, thought-provoking panel sessions and in-depth interviews with top industry executives. It will also host The Energy Year's prestigious Year's Awards, honouring the achievements and contributions of domestic and international players across Kuwait's energy value chain.

In addition to celebrating excellence, the event will showcase high-value investment opportunities and provide a platform for companies to share insights and forge partnerships to drive Kuwait's energy transformation.

JOIN US for a day of dialogue, high-level engagement and meaningful relationship building in a dynamic and exclusive setting.

“ Offshore discoveries expand our domestic resource base and provide feedstock flexibility for downstream and petrochemicals integration. ”

SHEIKH NAWAF S. AL SABAH
CEO
KUWAIT PETROLEUM CORPORATION

EVENT SPONSORS

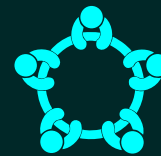

Be part of an exclusive event and an invaluable opportunity to reflect on Kuwait's energy journey throughout 2025

Build new networks to advance partnerships and collaborations with key energy stakeholders in a relaxed and constructive environment

Follow open and candid interviews with energy experts

Be part of a meaningful roundtable discussion about the current state and priorities of Kuwait's energy industry

Enjoy our Panel Discussions, Networking Session, Book Launch & Awards Ceremony

Grab a copy of The Energy Year Kuwait 2025 report

PROGRAMME SNAPSHOT

- 09:00** Registration & Networking
- 09:30** Welcome Address by The Energy Year
- 09:45** Keynote Address
His Excellency Jamal Essa Al-Loughani, Secretary General of OAPEC (Organization of Arab Petroleum Exporting Countries)
- 10:00** Panel Discussion 1
Navigating the Future of Kuwait's Upstream & Oilfield Services: Innovation, Sustainability & Strategic Partnerships
- PANELLISTS:
Bader Al Attar · *Managing Director of Planning & Finance* · KPC
Anwar Al Mutlaq · *Vice-President and Country Chair* · Shell Kuwait
Mohamed Helal · *Managing Director, Kuwait* · SLB
Emad Al-Ajmi · *Country Director, Kuwait* · Baker Hughes
- 10:45** Audience Q&A
- 11:00** Networking Break
- 11:15** Keynote Address
Ministry of Electricity & Water & Renewable Energy
- 11:30** Panel Discussion 2
From Data to Decarbonisation: Unlocking Smart Energy Systems and Technology-Driven Sustainability in Kuwait and the MENA region
- PANELLISTS:
Abdullah Mohammed Al-Ayyar · *Deputy Managing Director for Sustainability* · KPC
Paul Duncan · *Technical Director* · MENA Terminals Fujairah
Alaeddine Karim · *Country General Manager, Kuwait* · Microsoft
- 12:15** Audience Q&A
- 12:30** Year's Awards Ceremony
- 13:15** Closing Remarks
- 13:30** Networking

PANEL 1

NAVIGATING THE FUTURE OF KUWAIT'S UPSTREAM & OILFIELD SERVICES: INNOVATION, SUSTAINABILITY & STRATEGIC PARTNERSHIPS

Kuwait's upstream sector is entering a decisive new phase as the country advances toward its goal of reaching 4 million bopd production capacity and shifts investment priorities across mature and frontier assets. With major offshore activity emerging in the context of KPC's USD 410-billion long-term energy strategy, the focus is turning toward accelerating development through technology, innovation and strategic partnerships. As Kuwait expands capacity and adopts next-generation digital and sustainable solutions, stronger collaboration between operators, service companies and technology providers will be essential to shaping the sector's competitiveness over the next decade.

KEY DISCUSSION TOPICS

1. Offshore expansion as Kuwait's next major frontier for upstream growth and long-term diversification
2. Leveraging technology and innovation to unlock capacity, enhance performance and reduce operational risk – including the role of the Ahmadi Innovation Valley
3. Partnerships to accelerate project delivery and strengthen service-sector capabilities across the upstream value chain

PANEL 2

FROM DATA TO DECARBONISATION: UNLOCKING SMART ENERGY SYSTEMS AND TECHNOLOGY-DRIVEN SUSTAINABILITY IN KUWAIT AND THE MENA REGION

Kuwait and the MENA region are pursuing parallel goals: improving energy system efficiency, reducing carbon intensity, strengthening digital resilience and advancing a pragmatic energy transition. Achieving these outcomes requires both operational excellence – supported by advanced digital technologies – and the development of viable lower-carbon energies that can scale across regional markets. This panel brings together leaders shaping national sustainability strategy, regional biofuels and SAF development across MENA, and digital innovation and cybersecurity from a global technology perspective. Together, they will explore practical pathways to optimise energy systems, strengthen digital security and accelerate the role of advanced fuels in a diversified regional energy mix.

KEY DISCUSSION TOPICS

1. Practical steps to reduce emissions across refining, petrochemicals, power generation and heavy transport in Kuwait
2. Role of advanced analytics, automation and AI to deliver quantifiable improvements in performance, asset optimisation and system utilisation. Barriers that limit deployment in energy systems and how to overcome them
3. How to advance a pragmatic energy transition, acknowledging the continued role of oil and gas alongside new energies and clean fuels such as biofuels and SAF
